invention relates to a drilling system, particularly a drilling system for a perpendicular steering in a drilling into a rock type, such as, for example, a rock, a building, a railway track, a vehicle roadway or the like.

2. Description of the Related Art In a drilling for

building constructions, in particular, a drilling for a rock type, the problem is that the same usually takes place that the drilled rock chamber gives an influence into the driving or guiding of the drilling rod through the drilled hole.

Furthermore, the problem

arises that the outside of the drilling rod becomes soiled with particles, which are brought along with the drilling tool, and to which a certain degree of wear may occur through the friction. The problem exists that the drilling rod has to be cleaned, which is not easy to

do. The problem exists that the drilling rod has to be re-sharpened, which is not easy to do. The problem exists that the drilling rod may be lost and also the drilling rod may tip over when it is used in a drill hole of a floor of a building
